

Launch your physics career with an internship at Elekta.

The clinically-focused Elekta Operational Physics team is proud to offer a four-month internship program. Designed to provide a solid theoretical and practical foundation of knowledge, you will have the opportunity to build your resume with a respected company and bring enhanced value to the radiation therapy community.

WHY CHOOSE ELEKTA?

- Full Elekta physics training
- Multiple QA vendor experience
- Practical training on the implementation of AAPM Task Groups
- First-hand industry knowledge

REPUTATION

Elekta is a long-time supporter of the American Association of Physicists in Medicine in developing graduate physicists.

"Not only would such internships provide these young physicists with an introduction into medical physics career possibilities in industry, but it would also provide the hosting company ready access to talented young individuals"

—John M. Boone, President of AAPM

INTERNSHIP DETAILS

- Applicants should be recent CAMPEP Medical Physics Program graduates
- Internship Length: 4 months
- Location: Atlanta
- Recruiting Cycle opens August, November and April
- Biweekly stipend
