

Dear McGill Researchers,

The Office of Sponsored Research is pleased to announce that Fanny Dupuy, Business Development Specialist, is now available to meet with you and your research teams to provide support to McGill researchers interested in Mitacs programs and interactions with industry. Fanny will be available for meetings at the Office of Sponsored Research on Mondays and Wednesdays and is also available to meet on campus any time during the week.

If you are interested in learning more about Mitacs programs, or meeting with Fanny, please contact her directly at fdupuy@mitacs.ca or 514-603-9409.

About Mitacs:

Mitacs supports national innovation by coordinating collaborative industry-university research projects with human capital development at their core. Since 1999, Mitacs has been promoting academic-industrial R&D while supporting the development of future innovation leaders. More specifically, Mitacs:

- Helps companies and Not-For-Profits identify their innovation needs and matches them with academic expertise;
- Fosters cutting edge research tied to commercial outcomes;
- Builds international research networks, creating innovation leaders in Canada and abroad; and,
- Provides professional and entrepreneurship skills training for graduate students, so they have the tools to meet emerging innovation needs.

Mitacs offers the following programs to supervisors and trainees:

Accelerate

Mitacs Accelerate connects companies and Not-For-Profits with over 50 research-based universities through graduate students and postdoctoral fellows, who apply their specialized expertise to business research challenges. Interns transfer their skills from theory to real-world application, while the partner gain a competitive advantage by accessing high-quality research expertise.

Elevate

Mitacs Elevate supports postdoctoral fellows and Canadian companies and partners to collaborate on cutting-edge research projects and build capacity for the next generation of R&D management leaders. This two-year program provides fellows with an opportunity to lead a long-term research project with a partner organization while developing professional skills and benefiting from leadership training. Partner organizations engage Canada's brightest minds to pursue innovation as they undertake research projects in collaboration with universities and build research and development management capacity.

Globalink

Mitacs Globalink establishes and reinforces global links between Canadian and international partners through two-way student mobility initiatives between Canada and Mitacs partner countries Brazil, China, India, Mexico, Turkey and Vietnam. [Mitacs Globalink Research Internships](#) pairs top-ranked undergraduate students and faculty at Canadian universities for 12-week research projects of mutual interest, while the [Globalink Graduate Fellowships](#) provides financial support to former Globalink Research Interns to return to Canada for graduate studies at select Mitacs university partners. The [Globalink Research Awards](#) offer senior undergraduate and graduate students at Mitacs full and associate partner universities the opportunity to participate in 12- to 24-week research projects supervised by professors at accredited universities in Mitacs partner countries. [Mitacs Globalink Partnership Award](#) offers graduate students at Mitacs full and associate partner universities in Canada the opportunity to participate in a 16- to 24-week research project with an international industry partner
